Cautionary Notes and Considerations for Readers:

The following cautionary notes and considerations are provided to assist individuals with the interpretation and use of the data and information presented in this report.

Information in this document is provided for the purpose of facilitating a better understanding of the FNETB regional labour market landscape, based upon the most current information available on the date of publication.

The figures shown in all Census tables in the report have been subjected to a confidentiality procedure known as random rounding to prevent the possibility of associating statistical data with any identifiable individual. Under this method, all figures, including totals and detail, are randomly rounded either up or down to a multiple of “5”, and in some cases “10”. For example, random rounding of 12 to a multiple of 5 would yield either 10 or 15. Table cells which contain data ranging between 0 and 9 are subjected to random rounding between 0 and 10. Therefore, a cell showing “0” could actually have a value between 0 and 9. The random rounding technique provides strong protection against direct, residual or negative disclosure, without adding significant error to the Census data.

Every effort has been undertaken to ensure all care and diligence has been used in processing, analyzing and extracting the information used in the preparation of this document. However, the information is provided without warranty of any kind, either expressed or implied.

This document may be freely quoted and reproduced without the permission of the Far Northeast Training Board provided that the Far Northeast Training Board is acknowledged as the author of the document.
