INTRODUCTION

The Far Northeast Training Board (FNETB) is mandated to conduct an annual Local Labour Market Planning Process which includes the use of reliable and valid evidence to foster a common understanding of local labour market conditions through the collection and dissemination of local labour market information, community engagement and partnerships with a range of stakeholders including but not limited to, local employers, community leaders, service providers, and education and training institutions.

Through collaboration and engagement, and the collection, analysis and synthesis of local labour market information, the FNETB aims to raise awareness of existing local labour market priorities and needs – strengths, gaps, challenges, and priorities. The results of this analysis are expected to inform local business plans and local activities to address labour market issues.

This document contains data from the FNETB's most recent labour market forecast as well as some information collected locally to gain some insight on the occupations that are in highest demand. Please take the time to read the document prior to attending the planning meeting, note your comments and observations, and come prepared to share your input and help define the specific conditions of the labour market in your community. We look forward to a productive discussion with you and other local stakeholders.

As you read the information contained in this document ask yourself the following questions:

How does this reflect what you know of, or observe in your community?

What does it mean for the your community?

What does it mean for your organization?

**LOCAL LABOUR
MARKET FORECAST
2021-2031**

October 2023

The following pages provide the most recent FNETB Local Labour Market Forecast for the Chapleau region. The forecast is based on:

- Customized 2021 Census data - Number of people by 5-year age cohort, by occupations for the region and for sub-regions (CFDC).
- The assumption that people who were aged 55 and over at the time of the 2021 Census will retire between 2021-2031, as they reach the age of 65 which is the benchmark used to forecast the possible number of retirements. *(The age of retirement of 65 is estimated based on the retirement age data in the table below).*

	Both sexes			Males			Females		
	2011	2021	2022	2011	2021	2022	2011	2021	2022
Total all retirees	62.7	64.3	64.6	63.7	65	65.5	61.8	63.7	63.6
Public sector employees	60.9	62.4	62.7	61.6	62.8	63.7	60.4	62.1	62
Private sector employees	63	64.7	64.7	63.3	64.8	65	62.7	64.6	64.4
Self-employed	66.5	67.6	68.4	67.5	68.7	68.9	64.5	65.8	67.3

Cautionary Notes and Considerations for Readers:

The following cautionary notes and considerations are provided to assist individuals with the interpretation and use of the data and information presented in this report.

Information in this document is provided for the purpose of facilitating a better understanding of the FNETB regional labour market landscape, based upon the most current information available on the date of publication.

The figures shown in all Census tables in the report have been subjected to a confidentiality procedure known as random rounding to prevent the possibility of associating statistical data with any identifiable individual. Under this method, all figures, including totals and detail, are randomly rounded either up or down to a multiple of “5”, and in some cases “10”. For example, random rounding of 12 to a multiple of 5 would yield either 10 or 15. Table cells which contain data ranging between 0 and 9 are subjected to random rounding between 0 and 10. Therefore, a cell showing “0” could actually have a value between 0 and 9. The random rounding technique provides strong protection against direct, residual, or negative disclosure, without adding significant error to the Census data.

Every effort has been undertaken to ensure all care and diligence has been used in processing, analyzing, and extracting the information used in the preparation of this document. However, the information is provided without warranty of any kind, either expressed or implied.

When looking at the data used for this forecast, it is important to note that:

- It is based on the assumption that people retire when they reach the age of 65.
- It does not take into consideration economic shifts that might arise (positive or negative).
- Some positions might not be filled for a variety of reasons (restructuring, technology, etc).

In preparing this forecast, we break down the labour force 15+ in three cohorts:

- The **ENTRY** workforce – those who are about or have recently entered the workforce.
- The **MAIN** workforce – makes up the largest proportion of the total labour force.
- The **EXIT** workforce – those who were 55 and over at the time of the 2021 Census and who will reach the age of 65 or more by 2031.

Between 2011 and 2021, in the Chapleau region, the total labour force 15+ decreased by -9.6% (-610).

- The total labour force aged 15 - 29 decreased by -13.1% (-145). **ENTRY**
- The total labour force aged 30-54 decreased by -27.5% (-760). **MAIN**
- The labour force aged 55 and over increased 11.1% (+275). **EXIT**

At the time of the 2021 Census, the total employed labour force in Chapleau was 3,695. Based on the local forecast, between 2021 and 2031, a total of 1,095 people reach the age of 65 and could exit the labour market during that period. The three broad occupational categories with the highest number of potential exits are:

- Trades, transport and equipment operator and related occupations (370)
- Sales and service occupations (315)
- Business, finance, and administration occupations (115)

CHAPLEAU – TOTAL NUMBER OF POTENTIAL RETIREMENT BY 5 YEAR INCREMENTS

When breakdown the total of 1,095 potential retirements by five-year increments, we see that the largest portion of those retirements are forecasted for the period between 2021 and 2026.

445

(those who, at the time of the 2021 Census, were between 55 and 59 years old)

650

(those who, at the time of the 2021 Census, were 60+ years old)

CHAPLEAU – TOTAL NUMBER OF POTENTIAL RETIREMENT, 2021-2026 (1-DIGIT NOC)

A further breakdown the 650 potential retirements between 2021-2026 shows that 280 (43%) of those retirements have likely already happened as those who were 65+ at the time of the 2021 Census would now be closer to 68+.

CHAPLEAU – TOTAL NUMBER OF POTENTIAL RETIREMENT, 2026-2031 (1-DIGIT NOC)

While information at the broader occupational category (1-Digit NOC) provides some insight on the future demand, more specific occupational details are sometime required for planning.

The following two pages provide a list of the occupations at the 5-digit NOC with at least 100 people employed in Kapuskasing at the time of the 2021 Census, and for which the percentage of potential retirements between 2021 and 2031 exceeds the overall 30% indicated on page 5.
